AXON
D2FLEXio

Networked AVC System Solutions

ATTEROTECH

ASSEMBLED IN USA

Dante®
AES67

Product Overview

The D2FLEXio provides cost effective analog audio connectivity for installed AV systems.

Each analog audio I/O features an installer selectable switch to assign input or output audio connectivity. This flexibility provides a single product solution for cost effective analog audio conversion to and from any Dante or AES67 system.

The small, unobstrusive form factor provides easy installation - anywhere.

Applications

Retrofit connectivity for legacy AV equipment to and from a Dante or AES67 audio network

- Power amplifers and powered speakers
- Wireless mic receivers
- In ear monitor transmitters
- Electronic instruments and DJ equipment
- Mixers, DSPs and other audio signal processing gear

Front

Key Features

- Dual analog flex I/O, selectable via recessed slide switches (2x0, 1x1, 0x2)

- I/O trim potentiometers for accomodating "pro" and "consumer" audio line levels

- 44.1, 48, 88.2, 96 kHz, 24 bit audio conversion to and from a Dante network

- Small form factor with integrated mounting tabs

- PoE or DC powered

- Supports Dante Domain Manager
